## Data Sources Used in this Report

### DToC

All figures relating to the number of delayed days or the number of DToC bed days have been taken from the CSV Format Monthly Delayed Transfers of Care files as published on the NHS website on the second Thursday of each month at:

<https://www.england.nhs.uk/statistics/statistical-work-areas/delayed-transfers-of-care/>

### Population

Rates per 100,000 population for each local authority use the appropriate mid-year estimates for the population aged 18+ as produced by the Office for National Statistics each year.

The 162 days decrease for Lancashire includes a decrease of 256 attributable to NHS (a decrease of 10.4%) and an increase of 64 attributable to social care (an increase of 3.4%). By comparison, our comparator group shows an 8.8% overall decrease in days attributable to NHS and a 14.9% overall decrease in days attributable to social care. The total for all authorities has fallen overall by 6.9% for NHS and fallen by 12.1% for social care.

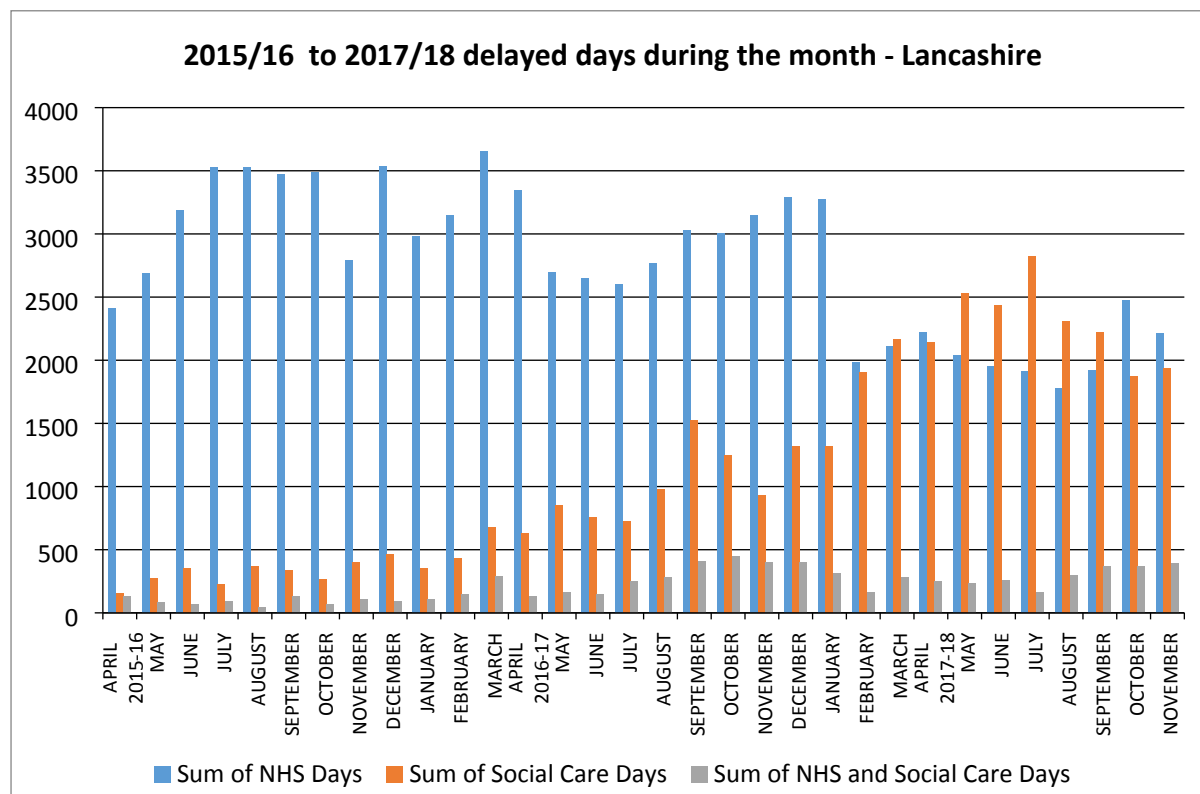

In comparison with the previous year, the Nov-17 figure of 4547 represents a 1.6% increase when compared with 4475 days recorded in Nov-16. Days attributable to NHS have decreased by 29.5% from Nov-16 to Nov-17 and days attributable to social care have increased by 107.9% over the same period.

## 1.2 Proportions attributable to NHS and social care

In Nov-17 for Lancashire a total of 48.7% of delays were attributable to NHS (down from 52.5%) and 42.6% were attributable to social care (up from 39.8%), compared with the national figures of 58.3% attributable to NHS and 34.0% to social care. This is now the tenth successive month Lancashire has shown a larger proportion of delays attributable to social care than the overall national figure, but overall the proportion is still showing a steady improvement.

Nov-17				
Area	NHS Days	Social Care Days	NHS and Social Care Days	Total Days
Lancashire	48.7%	42.6%	8.7%	100.0%
Comparator group	55.8%	33.3%	10.9%	100.0%
All authorities	58.3%	34.0%	7.6%	100.0%

Nov-17 shows a slight increase in delayed days attributable to social care, but the overall trend still shows a general improvement after the peak in Jul-17.

## 2 DToC Targets

### 2.1 Better Care Fund

Lancashire agreed a Better Care Fund target reduction to 747.8 social care delayed days to be achieved by Nov-17. The Nov-17 figure of 1936 social care days is worse than the Oct-17 total of 1872, but is an improvement on the Sep-17 figure of 2218 days and the Aug-17 figure of 2306, and still some distance from the target of 747.8 days.

### 2.2 DToC Bed Days per 100,000 population aged 18+

The DToC Bed Days figure is calculated by dividing the number of delayed days during the month by the number of calendar days in the month and then dividing by the population aged 18+ for each authority.

Government targets were announced for all CCGs and local authorities to be achieved by Sep-17 in an effort to help improve A&E performance and reduce winter pressures. The overall Lancashire target for Sep-17 was set to a maximum of 8.8 DToC bed days per 100,000 population aged 18+ and the social care Lancashire target for Sep-17 a maximum of 2.6.

The Nov-17 figures show Lancashire still missing both targets by some distance. The overall Nov-17 Lancashire total of 4547 days equates to 15.9 DToC bed days per 100,000 population aged 18+ (compared with 16.0 in Oct-17) and the Lancashire Nov-17 social care figure of 1936 days equates to 6.8 days per 100,000 population aged 18+ (compared with 6.3 in Oct-17).

Out of 151 authorities Lancashire currently rank 124<sup>th</sup> for total DToC bed days per 100,000 pop aged 18+ and 132<sup>nd</sup> for social care bed days.

Measure	NHS Days	Social Care Days	NHS and Social Care Days	Total Days
Target Sep-17 DToC Bed Days per 100,000 18+ pop	5.5	2.6	0.7	8.8
Actual Nov-17 Number of DToC Days	2216	1936	395	4547

Rank Nov-17 DToC Bed Days per 100,000 18+ pop	107	132	123	124

The tables on the following page illustrate the national rank scores for NW authorities from Apr-17 to Nov-17. The first table lists rank scores for the total DToC bed days per population and shows no change for Lancashire with a ranking of 124 in Oct-17 and Nov-17. The second table lists rank scores for social care DToC bed days per population and shows a slight worsening for Lancashire from 129 in Oct-17 to 132 in Nov-17, both ranks being a welcome improvement on the rank of 138 scored in May-17 and Jul-17.

In Nov-17 Lancashire were 4<sup>th</sup> highest out of 16 comparator authorities for the total bed days per 100,000 population aged 18+.

### Social Care DToC Bed Days per 100,000 population aged 18+ (lower is best)

In Nov-17 Lancashire were 9<sup>th</sup> highest out of 23 NW authorities for the social care bed days per 100,000 population aged 18+.

In Nov-17 Lancashire were 4<sup>h</sup> highest out of 16 comparator authorities for social care bed days per 100,000 population aged 18+.

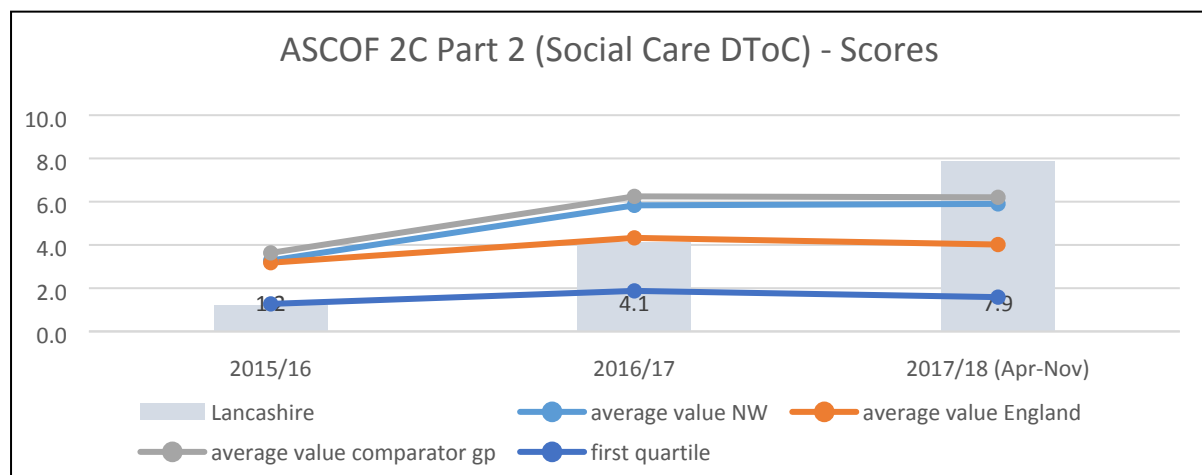

## 2.3 ASCOF 2C indicators

As of April 2017, data on the number of patients delayed on the last Thursday of the month is no longer being collected and so the ASCOF 2C scores will no longer be calculated according to the previous definition. This measure has been replaced in the Delayed Transfers of Care publication files by the measure called DToC Beds. The DToC Beds figure is calculated by dividing the number of delayed days during the month by the number of calendar days in the month. This provides a similar figure to the patient snapshot, but is more representative of the entire month rather than providing a view on one particular day. The new indicator is in 3 parts:

- 2C part 1 (total delayed transfers)
- 2C part 2 (delayed transfers attributable to social care)
- 2C part 3 (delayed transfers jointly attributable to NHS and social care)

The social care element of the new indicator definition has been recalculated for Lancashire and all authorities for 2015/16 to 2017/18 (Apr-Nov) to provide some comparison of current data with previous years. It is evident that the Lancashire score has increased far more than the national and regional benchmarking.

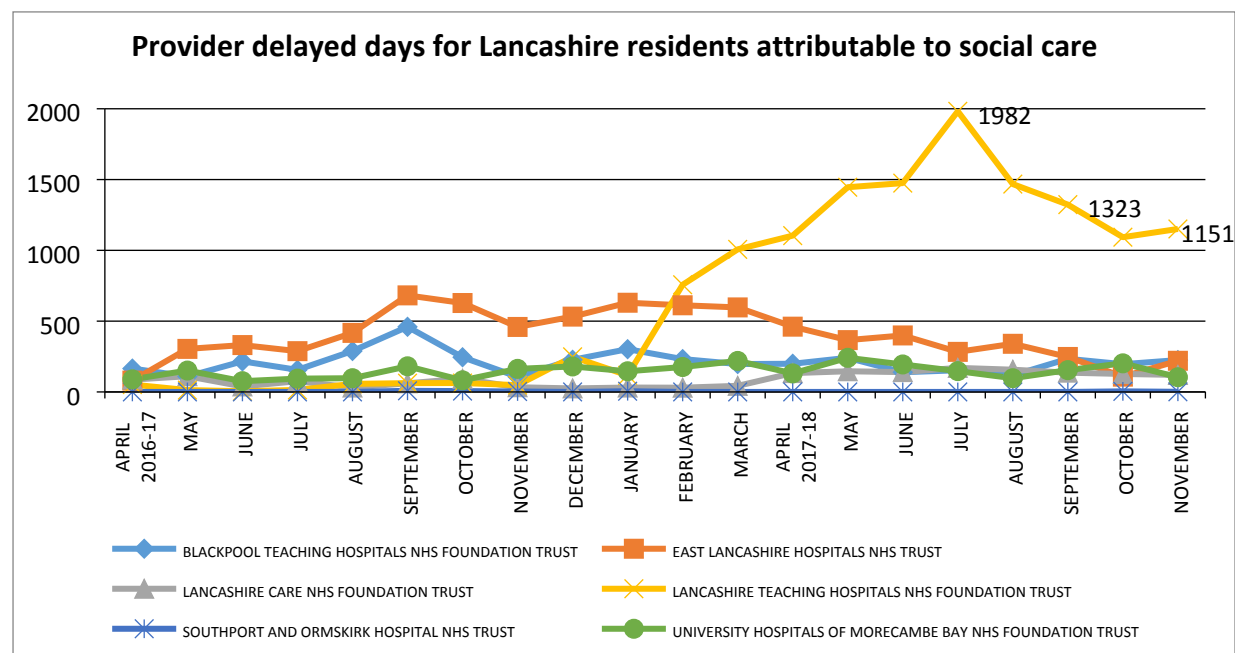

Lancashire has gone from being in the top quartile to the bottom:

## 3 Provider Analysis

### 3.1 Trend Analysis for Lancashire Main Providers

Nov-17 reveals a slight increase to 1151 social care days for Lancashire residents at Lancashire Teaching Hospitals NHS Foundation Trust, after a steady rise from Feb-17 up to a peak of 1982 days in Jul-17.

Within the provider parent organisation of NHS ENGLAND NORTH (LANCASHIRE), three of the four providers recorded numbers of delayed days attributable to social care well below the parent provider average of 535.5:

The 20 providers recording the highest numbers of delayed days attributable to social care are shown in the chart below. All exceed the average for their parent provider group. Lancashire Teaching Hospitals NHS Trust (ranked 223) is one of several providers to have recorded over twice the parent provider group average.

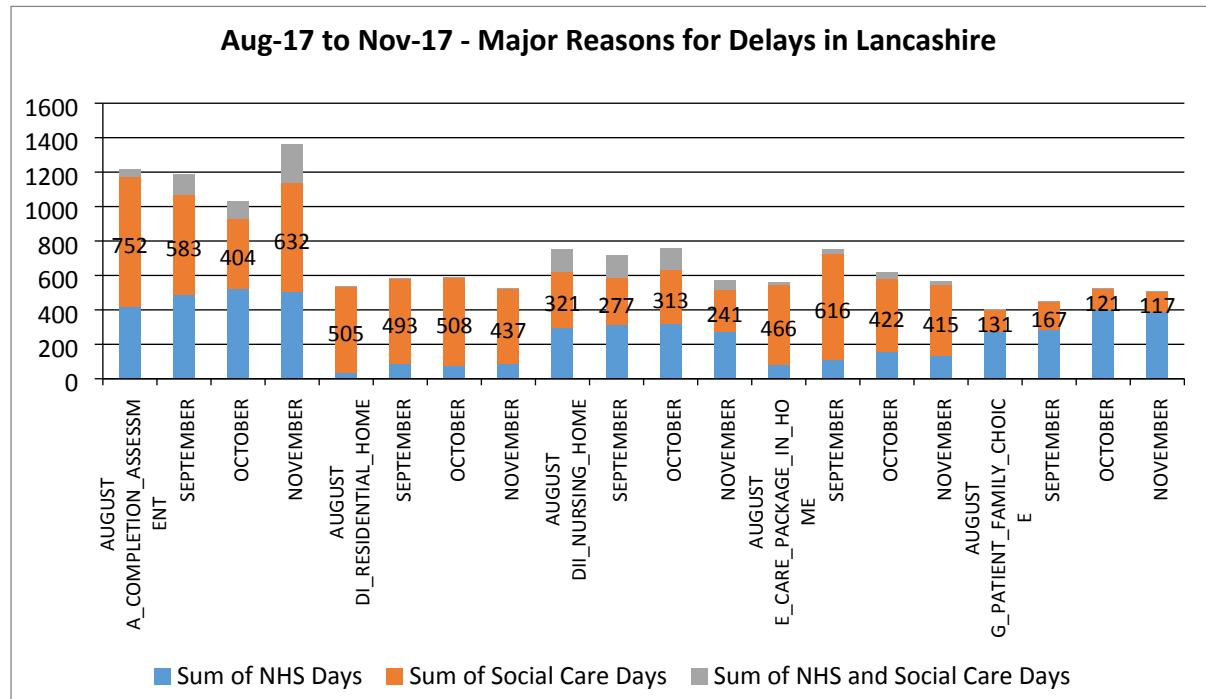

## 4 Reason for Delay

In Nov-17 the primary reason for delays was assessment completion once again and shows an overall increase from 1028 in Oct-17 to 1363 in Nov-17:

The Nov-17 overall increase for assessment completion reverses the recent trend of a decrease for social care and an increase for NHS, but continues an increase for jointly attributable days. Recent trends for the other major reasons through Aug-17 to Nov-17 show a decrease for social care attributable delayed days in arranging nursing care (from 313 in Oct-17 to 241 in Nov-17) and arranging a care package (from 616 in Sep-17 to 415 in Nov-17):

Of the 632 delayed days recorded in Nov-17 for delays in assessment completion attributable to social care, a total of 487 (77%) were recorded by Lancashire Teaching Hospitals NHS Foundation Trust, but this is still a vast improvement on their figure of 1050 recorded in Jul-17:
