**Executive Summary**

This is the first of a proposed regular new report for boards across the system to provide an update on both the development of the plans (operational and strategic) and on key aspects of service delivery and developments during the year.

This paper is intended to support the consideration of a proposed strategic narrative for the Lancashire and South Cumbria (L&SC) Integrated Care System by Clinical Commissioning Group Governing Bodies, Provider Trust Board and Local Authority leadership teams. The paper also outlines the process of engagement on that narrative that we are proposing to undertake.

The slide set attached (Appendix 'A') proposes that the Lancashire and South Cumbria Integrated Care System endorses eight partnership priorities for changing the way we work as a system – priorities which enable us to explain our vision for future system working to our staff, patients, citizens and stakeholders and to set out how working in partnership will enable us to tackle our most significant challenges.

**Recommendations**

The Health and Wellbeing Board is asked to:

- (i) Comment on the strategic narrative which has been developed by the Lancashire and South Cumbria Integrated Care System.
- (ii) Endorse the strategic narrative document as the basis for the development of the Lancashire and South Cumbria Integrated Care System five year plan.
- (iii) Endorse in principle the eight priorities within the document, subject to the outcomes of a proposed engagement process.
- (iv) Endorse the proposed engagement process with patients, citizens, staff and wider partners and support the actions required to deliver it effectively.
- (v) Support the further system development work now being arranged in respect of provider collaboration, commissioning and partnership between local authorities and the NHS.

**Background**

As outlined above.
