

Healthier Lancashire and South Cumbria Change Programme
Lancashire Health Overview Scrutiny Committee
14th June 2015

- Thank you for the opportunity to:
 - give members of the Health Scrutiny Committee an update on the progress of the Healthier Lancashire and South Cumbria Change Programme
 - and; outline what the next crucial steps are, around the Case for Change and what we believe the Committee would want to consider at its July meeting.

The Lancashire health and care leaders on 19th November, decided that...

- A programme of scale and ambition was required to deliver sustainable health and care services for Lancashire and South Cumbria.
- Healthier Lancashire is working with local people and organisations to change how social care and health and wellbeing services are delivered. The scale of the financial challenge facing public services, coupled with local communities that are generally unhealthier and have a shorter than average life expectancy means we need a radically new and different approach to building a healthier Lancashire and South Cumbria.

- There are a number of improvement plans in place to address the local population challenges.
- However, all the organisations involved in Healthier Lancashire and South Cumbria were keen to understand the consistency, interdependencies and gaps across these.

What are our gaps?

Health and wellbeing

Care and quality

Finance and efficiency

What is our case for change?

The health and well being outcomes and quality of life for our population are amongst the worst in the country.

We need to improve the physical, emotional health and wellbeing of our people and support them to thrive.

Our population deserve better, our workforce deserve better, we deserve better.

What are our priorities?

Primary Care Transformation

Regulated care sector

Prevention

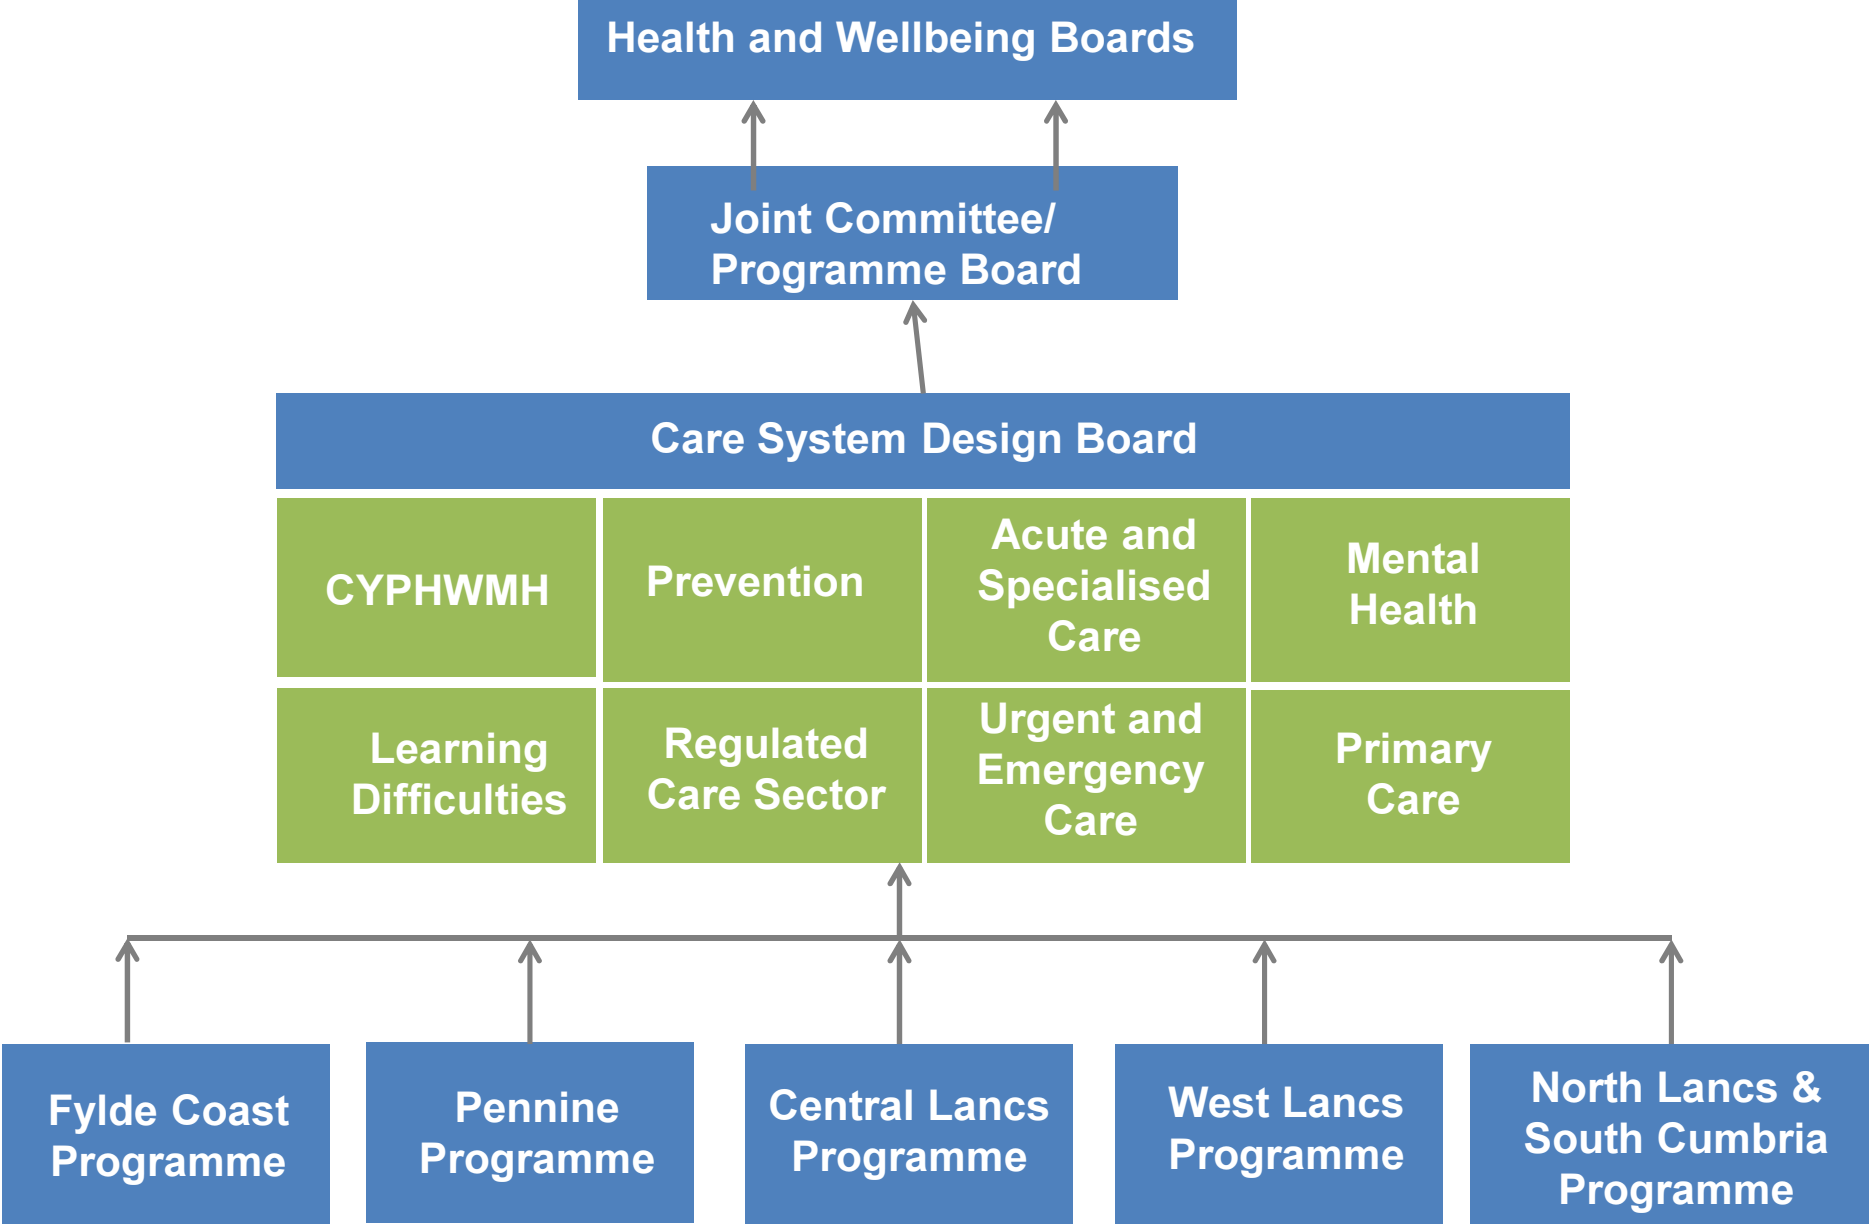

Urgent and emergency care

Acute and specialised

Children and young people's mental health

Learning disabilities

Mental health transformation

- In the last few months the focus has been on establishing the appropriate infrastructure and resources to be able to mobilise the programme.
- The critical next step that we will soon be engaging with you and the public on is what the case for change is going to say.
- After that the next step will be to look at the options for changing social care and health services.

- We would like to bring to this committee the Case for Change
- And the programme plan, including our plans for involving, communicating and engaging the politicians, workforce and general public
