

Central Lancashire Construction Skills Hub Event

The Central Lancashire Construction Skills Hub is a partnership between Preston's College, UCLan and a number of specialist construction training providers. The Hub held a skills event at Preston's College in July 2017 to:

- provide businesses in the central Lancashire area with a City Deal update,
- raise awareness and offer support in regards to apprenticeships, and
- Promote meeting social value outcomes via construction projects' in Central Lancashire.

Over 50 different organisations attended from Central Lancashire.

Meet Marcus & Danny **PRESTON'S COLLEGE**

Two Chorley apprentices recently beat strong competition from across the region to take first and second place in the UK's largest multi-trade competition, SkillBuild.

The pair were competing in the competition's regional heats against other tradespeople from across the North West in the Painting & Decorating category.

Marcus Crook, who works for JAY Decorators, took second place in his first year as an Apprentice while Redrow Level 3 Apprentice Danny O'Shea scooped first place on his third attempt.

Level 2
Apprentice in
Painting &
Decorating
Employed by JAY
Decorators

Danny O'Shea
Level 3
Apprentice in
Painting &
Decorating
Employed by
Redrow

UCLan Masterplan Public Consultation

During the pre-planning application period for the Student Centre and Square, UCLan conducted a variety of public consultations to explain the scheme, get public feedback and encourage the public to get involved in the Masterplan project. This included a children's corner with construction themed activities and free refreshments for all who attended. 90 members of the public attended these consultations, all leaving with a better understanding of the project and the construction works around it.

STEMFirst 'Bridge the Gap' in City Deal schools

In partnership with STEMFirst, and in response to school demand, the Skills Hub have developed the 'Bridge the Gap' game from the 2016 Lancashire Science Festival into a school based activity about City Deal and construction careers. The activity has been bought by businesses and post 16 education providers, such as Eric Wright, Preston's College and Future U, and they will deliver it in schools. There has been training for their staff and pilots in 5 schools with 122 young people have been delivered, with more organisations due to come on board in the coming weeks. The activity will be delivered in City Deal schools throughout 2017/18.

"I really enjoyed the session and it has made me consider a job in STEM"

Apprenticeships
Professionals and Trainees

Richard Askew
Transport Planner

Before joining the scheme, I completed the 4 Year Integrated Master of Town & Regional Planning (MPlan) at the University of Liverpool achieving First-Class Honours. I also undertook voluntary employment at a Local Authority in Merseyside and an Architecture & Planning Consultancy upon completion of my degree in order to gain experience in the profession.

The opportunity to focus the broad range of skills I gained from my first degree and specialise in a Transport Planning role whilst studying a second Master's Degree strongly influenced my decision to apply for the Programme. Crucially, however, was the opportunity to work within a multi-discipline Local Authority and gain a wide range of experience whilst serving the citizens and service users in Lancashire.

"...the scheme felt like a natural stage in the progression between full time education and full time employment."

I occupied placements in the Planning Strategy and Policy, Highways Development Control and Transport Planning Teams and was involved in a variety of projects. During my final placement I was given the responsibility of producing the West Lancashire Highways and Transport Masterplan. I envisaged and was confident that the experience I gained through these placements would lead me to secure a permanent position within the authority upon completion of my graduate trainee contact – which proved to be the case as I now work in the City Deal Delivery Team!

The opportunity to progress your academic knowledge whilst gaining invaluable experience in the profession, combined with additional training and the continuous support provided by managers and colleagues make the programme, and indeed Lancashire County Council, an excellent base to commence a long and successful career.

CARDINAL NEWMAN COLLEGE STUDENT CASE STUDY

#WEARENEWMAN

Conlon uclan

UCLan Masterplan stand at Conlon Site Tours at the Lancashire Science Festival

The Masterplan team had a stand at the 2017 Lancashire Science Festival with construction themed giveaways and the 3D models of the campus and buildings to be constructed. The team were on hand to answer any questions from the parents and children who visited the stand throughout the day.

On Saturday 1 July as part of the Lancashire Science Festival weekend Conlon conducted site tours for festival goers. They took parents and children on tours of the Foster Social Space, explaining what was happening and then answering any questions about the construction of the building. The children were also visited by Charlie Conlon (the builder costume) and were given goodies to take away. Approximately 40 visitors took part in the site tours on the day.

Increasing Construction Placements and Internships

UCLan are working closely with Conlon to increase the number of students receiving placements and internships which should lead to more graduates being employed in Construction and Engineering roles. In January and February 2017 students and lecturers from UCLan's Foundation Year Building Surveying and Civil Engineering course had on-site lectures about building foundations, site processes and job roles. For some students it was their first time on a building site.

Student Profile

James Maguire

From: Christ the King High School

Apprenticeship: Engineering Level 2

Company: Pelann Engineering, Leyland

James is in his second year and is due to complete in 2020.

"This apprenticeship gives me the opportunity to make myself self-disciplined."

RUNSHAW COLLEGE

Conlon uclan

UCLan and Conlon working with Darwen Aldridge Community Academy

The students from the Academy spent several hours with Conlon Construction receiving hands on lectures for their course. These students are completing an accredited course in Design Engineering and Construction, which will lead them to a career in the construction industry. The students were guided around the site by Adam, the site manager, who introduced them to health and safety, site standards and the construction work that was taking place on site.

National Careers Service Construction event for Teachers

The Construction event on 12th July was hosted by BSRIA. The event featured presentations from the host organisation BSRIA, CITB and Eric Wright, a tour of BSRIA's new facilities at Walton Summit and a demonstration of the equipment.

The aim of the event was to challenge the preconceptions that teachers may have about the modern Construction industry and inform them of the career opportunities that exist for young people in the City Deal area.

Teachers attended and the following schools were represented: Parklands, Southlands, Lostock Hall, St. Bede's Blackburn, Blackburn Royal Grammar School, Runshaw College, Ashton Community Science College, Ribblesdale High School, Preston's College, as well as Community Gateway and UCLAN.
