

STATEMENT OF REASONS

"The purpose of this proposed order is to amend the measurements of the bays to match the placement of the charging units allowing for full utilisation of the bays".

REASONS UNDER Section 1 of the RTRA

- (f) for preserving or improving the amenities of the area through which the road runs

Justification Statement

The work will cover minor revisions to provisions that are already in place and will not have significant impact on other waiting restrictions in the area. It is considered that the work will not impact on commuter parking but will ensure that the council can correctly provide the necessary provisions to allow the usage of this green travel option. As this is the case it is considered that the present Covid-19 restrictions will not significantly impact on the formal consultation of the proposals.
