Oracle R12 to Fusion Oracle vR12 supports the heart of the council's people and financial resources. R12 is now end of life and is approaching the end of the final extended support period. LCC have embarked on a programme to replace R12 with Oracle Fusion and associated new processes for managing our money and our people information for 45,000 users. Further risk of challenge to implement Fusion exists when contract novation from BTLS to LCC is executed. Failure to assign resources to the Oracle Fusion Programme will leave LCC without the ability to complete the project on time		Should the Fusion Programme fail, major disruption can be expected in the management of the Council's money, suppliers, customers, debtors, creditors, current workforce, retired workforce and impact for other beneficiaries of the system outside of LCC specifically with payroll services. Current Controls Oracle Fusion Fusion Project Board established, SRO identified, programme under active management of the Chief Digital Officer. Data Some management information is provided through appropriate Service Management Line of Business Systems. These systems are supported through best practice reporting and through the contribution of the Business Intelligence Team. This team are a stretched resource and cannot cover all data for the County Council. Core Systems Controls for this are informal and exist on a basis of replacing the systems at the very end of their life as they are about to, or following, the data they go out of support by their vendor. <p>Core Systems</p> <ul style="list-style-type: none"> The appointment of the Chief Digital Officer, the insourcing of the IT function and the creation of a Head of Architecture are helping to support the development of improved ways of working. The Head of Architecture is responsible for having agreed roadmaps for maintain products either via a SaaS (Software as a Service) route or regular updates products to enable business department to have LOB systems that provide the support for their respective function. The top SaaS product is the migration to Oracle Fusion which is the subject of a separate risk. A Head of Digital Business Engagement post has also been created and filled to ensure that digital services understand and help to deliver service needs. 	<p>Chief Digital Officer</p>
<p>Progress:</p> <p>Oracle Fusion</p> <ul style="list-style-type: none"> Reviewed the Fusion Programme delivery plan due to a delay in sign off for HR & Payroll solution design, which would allow us to move into the build then testing phases of the programme. At the same time, we have been assessing options to accommodate historical data in the Fusion system for Lancashire Constabulary (LanCon). This replanning activity has resulted in a delay to the delivery of Fusion, and the target Go Live dates are now June for Finance and Procurement (ERP) and early July for HR & Payroll (HCM). In addition, following a series of discussions with LanCon and LCC senior stakeholders, it has been agreed that LanCon will separate from the Programme. Over the coming weeks, we will focus on working with LanCon to support them in the transition, and on impact assessing the Programme scope change. ICT Digital Services will continue to provide support for LanCon through a transition programme, which is to be initiated. During August, our Change Network were briefed about the replanning and delay to Go Live. Business Readiness Leads have been briefed about the revised Roadmap and target June / July 2022 Go Live, and further 'All Staff' communication has been shared. <p>Data</p> <ul style="list-style-type: none"> Head of Data post in place as part of the new Digital Services structure.

Opportunity ID: CO1		Title: Strengths Based Working		Current Opp score: 15	Target Opp Score: 20
Opportunity Description	Opportunity Consequences	Opp Owner	Current Likelihood	Current Impact	
Covid has been a catalyst for a number of positive changes to the way we work.	The 'lessons learned' have provided a platform for future ways of working. We have made a significant number of changes that we will endeavour to maintain.	ASC leadership	Certain	Moderate	
Remote working has enabled people to adopt a more flexible approach to their work/life balance, we have embraced technology as a way of staying in touch with our teams and our service users and providers, we have used people's skills in a more flexible way and have trusted them to get on and do, we have spent far less time in planning and more time in doing, we have maintained 'light touch' governance and stuck to the decisions that we have made, and we have proved to ourselves and our partners that we can continue to provide high levels of customer service and response in a crisis.	We will build on the relationships that we have developed with our partners and will continue to take a 'system wide' approach to decision making.	Target date March 2022	Target Likelihood Certain	Target Impact Major	
	We will trust our staff to work at home, but we must be mindful not to disregard the disbenefits of home working and will seek to achieve a more balanced approach when we are able to.		Target Opp Confidence <div></div>		
	We are able to take advantage of technology to improve the way we work and also improve and enhance our service offer.				
	We will pursue the 'joint funding' approach and seek to agree the use of pooled budgets where appropriate.				
	We will maintain the level of engagement that we have achieved with our valued providers. We will move forward at pace our market shaping work and will involve providers and service users at the forefront of our thinking.				
There are many 'lessons learned' with our partners including our health and district colleagues and we have demonstrated that spending time arguing about 'who pays' is unproductive and unhelpful for our citizens.	We have used our staff flexibility. Many of them have stepped forward to take on new roles and have been very successful. We have recognised the huge amount of talent and commitment that we have across all of our teams.
