

## Appendix B

### Brindle Road Bus Stop TRO Statement of Reasons

The purpose of this proposal is to provide functional and accessible bus stop facilities on Brindle Road, Bamber Bridge outside the Hospital Inn. The existing bus stops will be upgraded to Equality Act compliant boarding points (raised kerbing & level boarding points) with clearway box markings.

The introduction of improved bus stop facilities in this location would allow public transport to be more accessible for wheelchair users and pushchairs. The bus stop clearway box markings would also prohibit unauthorised vehicles from parking within the stop, allowing the bus to align its access point with the level boarding point.

The proposals include the relocation of the existing southbound bus stop to a more appropriate location.
