Recommendation

That consideration be given to the request for grant funding as set out in this report.

Detail

On 16 December 2021, Full Council approved the reintroduction of the Local Member Grants. Under the scheme, each county councillor has been given a specific budget which they can spend to enhance the economic, social, and environmental well-being of people who live in their division. Following the reintroduction, using powers in the Local Government and Public Involvement in Health Act 2007, the Leader of the County Council has authorised individual county councillors to take formal decisions on behalf of the county council.

The above legislation however does not apply to Cabinet Members as they already have these decision-making powers. The Cabinet Member for Economic Development and Growth is therefore being asked to consider and agree the application for funding (in relation to their own Local Member Grants Scheme budget) under the existing decision-making process for Cabinet (Executive) Members. Existing rules for executive decision making, including the notification of key decisions and provision for the call in of decisions will therefore continue to apply for Cabinet Members.

For the financial year 2024/25, each county councillor has a budget of £2000. Each councillor can also carry forward a maximum of £200 that was unspent in the previous financial year. County Councillor Aidy Riggott's total budget is set out in the financial section of the report.

Please give a detailed breakdown of your expenditure for your activity / equipment.

If you are not asking for the full amount of the cost of your activity / equipment, please give us details of where the rest of the funding is coming from. Please also explain what you will do if we give you the grant, but you do not get the other funding.

The project is being crowdfunded through numerous avenues including small funds, charitable donations from individuals, companies, and other socially focused organisations.

If the full amount is not reached the project, there are two options.

The first is to cut deliverables that do not hinder skills development and the communications aspects of the symposium itself as the commitment to improved literacy and community development will not be scaled back as this is paramount to

the project itself.

If cuts would be required, then the zone as an output cost would be preferable to cut then the education and communication side of the symposium.

It is not anticipated that this cut would be needed and much less anticipated would be cuts further than the removal of the zone and its associated costs.

The second option is to extend the funding process and seek further funding avenues. This would require delaying the project to early 2025 and is not preferred.

If the councillor offers a grant of less than you have asked for, please explain below how that will affect your proposal – for example, will you still be able to complete your project or purchase, will you scale the project back, or seek funding elsewhere?

The project is funded through multiple stakeholders and a grant offer less than asked for should not negatively affect the outcome of the project. It will potentially add further fundraising time to the process and/or require an element to be removed as described in section 9.

Although this is not anticipated the concept of targets not being reached is considered and a delay in delivery of the full project while in pursuit of required funds would be the preferred solution.

Will the activity involve members of your organisation having significant contact with children or vulnerable adults?
